info

Stay clean.

Complete self supporting chain protection.

In addition to the different chain ring versions (38 - 42 - 44 teeth) the programme has been completed for different gear appliances.

The classic rear section fits after gear alteration for Alfine (350 RD 18). For i-MOTION the rear section 350 Ri 18 was developed and the model 350 RS 15 is now available in perfect adaption for Rohloff.
